

# FACE IRREGULARITY STRENGTH OF GRAPHS OF TYPE (A, B, C)

ALI OVAIS

ABDUS SALAM SCHOOL OF  
MATHEMATICAL SCIENCES

TUESDAY OCTOBER 9, 2018  
2:00PM

We investigate face irregular labelings of plane graphs and we introduce new graph characteristics, namely face irregularity strength of type  $(\alpha, \beta, \gamma)$ . We obtain some estimations on these parameters and determine the precise value for certain families of plane graphs that prove the sharpness of the lower bounds.
